Scott,

Sorry--his requests came a little late. They are bringing their own laptop, so you don't have to bring yours. Thanks anyway.

Jill

I can bring a 13" personal laptop for the DVD ... not ideal but workable. had I known about the flipchart I could have brought one home Friday, but I'm taking the bus on Monday so won't be able to get one before the trip

re meeting with Day Owen at Eugene Library

**re meeting with Day Owen at Eugene Library**

Dear Alan,

Day Owen has written me with some late requests. I am hoping the library can help out--if not, just let me know. Mr. Owen suggested that maybe a different meeting location could be found if the facility couldn't help, but I am not going to ask for a new location--it's just too late.

He has asked if the meeting room has a blackboard or flip chart that he could use to diagram the scenario near his home. Can you find out if they do, please?

He also asked if the library could provide a means for showing some DVD footage to the assembled

group. Please let me know if this request can be accommodated at this late date. Alternatively, if Scott could bring a laptop with DVD capability, that would be good. Otherwise, I will suggest that someone in Mr. Owen's group bring a laptop to show the DVD.

Please note that Mr. Owen has also requested teleconferencing ability to bring in an expert from Minnesota. Rick and I think that the technical discussion would best be handled by the team here, and so I am going to suggest a phonecall with us at a later date. I'll put it in the context of providing comments on the FRNotice announcing receipt of his petition (and the docket hasn't opened yet).

If you would like me to contact the library directly, please let me know. Thanks so much for your help.--Jill

For those attending the meeting, here is the agenda that Mr. Owen is proposing:

#### Proposed Meeting Format /Agenda

1 p.m-1:05 EPA Introduces Itself and States its Intention for this Meeting.

1:05-1:25 Day Owen makes 20 minute presentation that includes DVD footage of helicopter spraying next to his home and the aftermath of the drift, with information on the topographical concerns and proposed remedies.

1:25-1:30 Testimony of Neila Crocker-Owen on being poisoned by aerial drift.

1:30-1:35 Testimony of teenager Alena Crocker on being poisoned by aerial drift.

1:35-1:40 Testimony of Gayle Henry on being poisoned by aerial drift and the effect it had on the cancer patient she was caring for.

1:40-1:45 Testimony of Eron King on her family being poisoned by aerial drift.

1:45-1:50 Justin King shows video footage of helicopter spraying pesticide in twenty mile per hour winds and the resulting drift near homes, lake, and Salmon-baring creek.

1:50-1:55 Video footage of Mary Jo Smith describing the birth defects of the child she was pregnant with at time of aerial drift exposure; doctor says these particular defects are rare and associated almost entirely to pesticide exposure during pregnancy.

1:55-2pm Testimony of Maya Gee on being poisoned by aerial drift.

2 pm- 2:05 Dan Gee speaks on the topographic concerns and introduces our expert on that topic, Stuart Turner, CPAg.

\*\*2:05 to 2:15 Telephone testimony by Stuart Turner on the topographic problems of our coastal mountain range related to aerial spray drift, erratic winds, moisture, etc

2:15 to 2:30 EPA Questions or Comments (NOTE: all questions for any of the speakers should be held until this point to enable us to stay within the times listed above)

**Note:** Our original request for a two hour meeting would have permitted more time for EPA questions and comments. If you want that additional time, simply take it here at the end of the ninety minute period and we will go a bit longer.

**Also:** In order to assure that none of our speakers go beyond their allotted time slots, we will have a time-keeper.

Note from Jill \*\* indicates the speaker that Mr. Owen wanted to include by telephone, but that we want to

put off to a later date.
